Unit 4, Lesson 1: Body Planes and Directions

1-General Body Plane Information (Question=3)

What is a body plane?

A directional term that describes a section of the body

A way to describe a body part in relation to a second body part

A method of abbreviation for body organs

The position in which a patient must lie

The correct anatomical position is the body upright and facing with:

The arms down at the sides and palms facing forward

The arms down at the sides and palms facing backward

The arms raised the sides and palms facing forward

The arms raised at the sides and palms facing backward

When in the correct anatomical position, the palms of the hand are facing:

Forward

Backward

In toward the body

Out away from the body

2-Other Directional Information (Question=2)

Which directional term defines body parts towards the point of attachment?

Proximal

Distal

Frontal

Dorsal

Which directional term defines body parts distant the point of attachment?

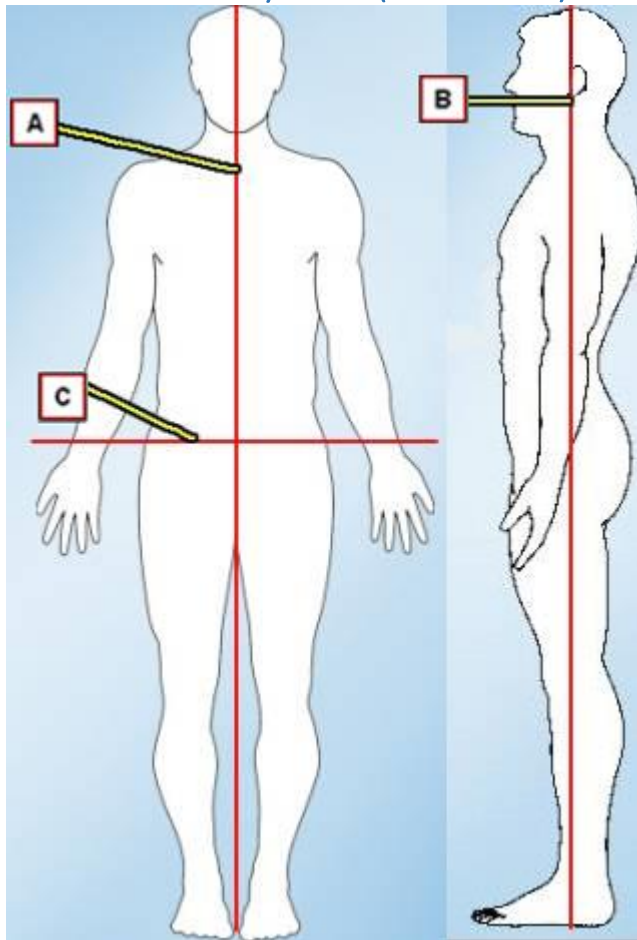

Proximal

Distal

Frontal

Dorsal

3-Transverse Body Plane (Question=8)

(Image 1)

Where is the transverse body plane?

A

B

C

(Image 1)

Which body plan divides the body horizontally into a top and bottom half?

Transverse

Midsagittal

Frontal

Body parts above other body parts are referred to as:

Body parts below other body parts are referred to as:

Superior
Inferior
Cranial
Transverse

Body parts towards the head are referred to as:

Transverse
Inferior
Cranial
Caudal

Body parts towards the lower end of the spine or feet are referred to as:

Superior
Transverse
Cranial
Caudal

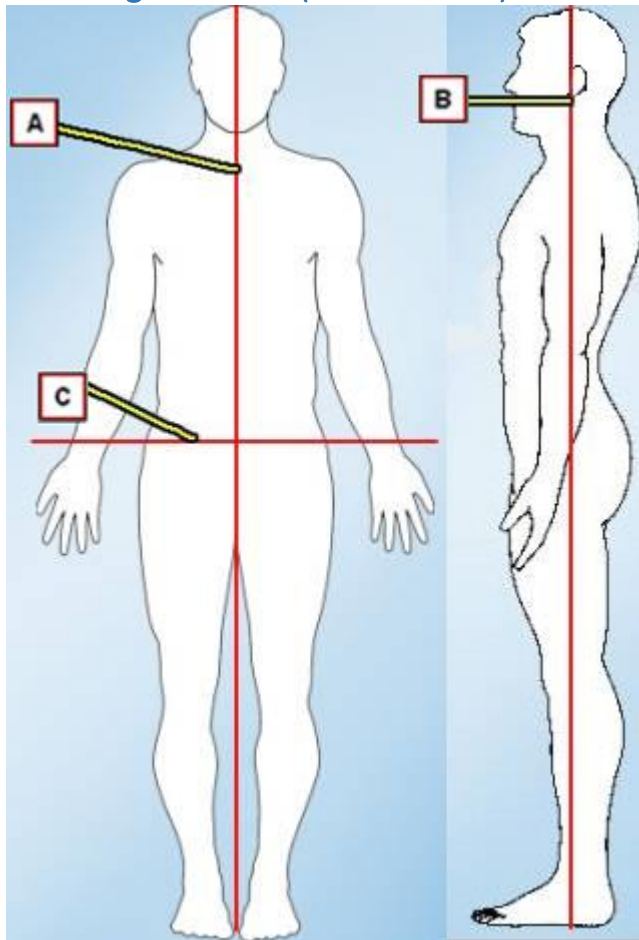

Which of these body parts is superior to the shoulders?

Neck
Foot
Wrist
Elbow

The cranial nerves would be found in which part of the body?

Head
Arm
Foot
Spine

4-Midsagittal Plane (Question=12)

(Image 2)

Where is the midsagittal body plane?

A

B

C

(Image 2)

Which body plan divides the body vertically into a left and right half?

Transverse

Midsagittal

3-Ventral Body Cavity (Question=22)

Which of the following is part of the ventral cavity?

- Cranial cavity
- Spinal cavity
- Thoracic cavity**

Nasal cavity

Which of these body cavities is located on the front side of the body?

Dorsal

Ventral

Spinal

Cranial

Which of these cavities is also known as the chest cavity?

Pelvic

Spinal

Cranial

Thoracic

Which of the following is contained in the thoracic cavity?

Trachea

Pancreas

Spleen

Liver

Which of the following is contained in the thoracic cavity?

Esophagus

Gallbladder

Reproductive organs

Stomach

Which of the following is contained in the thoracic cavity?

Bronchi

Liver

Bladder

Pancreas

Which of the following is contained in the thoracic cavity?

Lungs

Most of the large intestine
